

Austin Moore

Austinmoore1492@yahoo.com · <https://austinmoore1492.github.io/>

Determined and self-motivated Developer specializing in Languages/Frameworks such as JavaScript, React, Vue, Express, Node, MongoDB, Bootstrap, HTML, and CSS.

Projects

Currently I am creating a platform for the Fort Leonard Wood community to focus on news, events, and issues that involve the community. This application is built using React on the Front-End, Node and Express on the Back-End, Redux for state management, MongoDB for the Database, and currently is being hosted via Heroku.

You can view the Front-End of this application here:

<https://github.com/Austinmoore1492/FLWConnected-Front-End>

I have created a Full Stack E-Commerce site using React on the Front End, NodeJS and Express on the Back End, and Stripe to process payments.

You can view this applications code here:

<https://github.com/Austinmoore1492/FeedBack-Store>

I have also created another Full Stack application using Node, Express, and MongoDB on the backend and Vue on the Frontend.

The Frontend of the application can be viewed here:

<https://github.com/Austinmoore1492/Vent-It-Out>

Skills

- JavaScript
- ReactJS
- VueJS
- NodeJS
- Express
- MongoDB
- Bootstrap
- HTML
- CSS
- Team Oriented
- Great Communication
- Problem Solving
- Open Mindedness
- Accountability
- Adaptability
- Perseverance
- Determined
- Confident
